Cash flow returns

VN30 performance

The VN30Index recorded a breakout session, surging 2.16% to 1,927 points. Accordingly, 25 constituent stocks advanced, with SSI at the center as the ticker hit its ceiling price. Cash flow also moved into VRE (+4.76%), TCB (+3.80%), ACB (+3.64%), VPB (+3.21%), VHM (+3.17%), MWG (+3.16%), and FPT (+3.15%). On the other side, selling pressure remained on BSR (-0.56%) and VNM (-0.31%).

VN30 Future chart: Cash flow returns

The market turned positive with the appearance of a green candle with a long body. This qualifies as an exceptional breakout session, as liquidity grew strongly. Investor sentiment therefore reflects a sense of excitement in the final session of the week.

The uptrend may be confirmed once the contract climbs above the 10-, 20-, and 50-period moving averages. If the contract holds above these lines, the uptrend can be confirmed.

Investors should stay cautious, as an intraday correction may emerge after the contract's sharp gain in the previous session.

In the next session, the 1,800–1,820 point range will serve as strong short-term support. This zone corresponds to the bottom formed in late July 2026. Meanwhile, the 1,950 point area will act as strong resistance, as it coincides with the 50- and 100-period moving averages.

Technical strategy

The uptrend may return, but additional confirmation signals warrant further observation. Traders may therefore reopen Long positions once these signals appear.

Table 1. Future statistics (points, %, contracts)

	Close Price	% chg.	Trading Volume	Open Interest	Fair Value	Expire Date
