VN30 Future

Daily

28 Sep 2026

A pullback?

VN30 performance

After two consecutive sessions of correction, the VN30Index recovered and rose slightly by 0.33% to 1,938 points, with a nearly equal number of gainers and decliners. Capital tended to flow into VHM (+5.66%), VPB (+4.07%), VPL (+2.18%), VRE (+1.45%), and BSR (+1.33%). On the other hand, selling pressure persisted on SSB (-2.75%), GAS (-1.83%), and VNM (-1.32%).

VN30 Future chart: A pullback?

Despite the recovery, the index still closed below key moving averages, such as the 10-period and 20-period moving averages. Selling pressure remained at higher price levels, as the week's final candlestick had a long upper shadow.

Signals still lack consistency. Liquidity rose slightly, and the contract repeatedly crossed its short-term moving averages.

In addition, the contract fluctuates within a narrow range between 1,930 and 1,990 points. Therefore, a breakout signal is necessary to confirm the upcoming trend.

In the next session, the 1,900-1,930 zone will serve as strong short-term support, while the 1,990-2,000 zone will act as strong resistance, as it coincides with the July 2026 peak.

Technical strategy

Signals remain mixed. Therefore, Traders should stay cautious and watch for further signals in the next session before opening new positions.

Table 1. Future statistics (points, %, contracts)

	Close Price	% chg.	Trading Volume	Open Interest	Fair Value	Expire Date
