

2 Oct 2026

Further decline

VN30 performance

The VN30Index remained negative and posted its fourth consecutive decline, falling 0.85% to 1,890 points. Twenty constituent stocks declined, led by STB (-5.00%), LPB (-4.55%), VIC (-3.47%), SSB (-2.74%), and TCX (-2.23%). Four other stocks, VJC, GVR, BID, and VNM, also fell by more than 1%. On the other hand, capital flowed into MSN (+2.75%), HDB (+1.82%), and TCB (+1.38%).

VN30 Future chart: Further decline

The market declined further as investor sentiment remained pessimistic. The contract closed below its 10- and 20-period moving averages again. Higher liquidity indicates that the downtrend will likely continue.

In addition, the contract fell below its previous accumulation zone of 1,930-1,990 points. As a result, the target for this short-term correction may be the 1,860-1,880 range.

In the next session, the 1,860-1,880 zone will act as strong short-term support, as it coincides with the August 2026 low. Meanwhile, the 1,940-1,960 zone will serve as strong resistance.

Technical strategy

The short-term downtrend has been confirmed. Therefore, traders may reopen short positions in the next session.
