

30 Oct 2026

Moving average test

VN30 performance

The VN30Index experienced a correction session and dropped 0.69% to 1,877 points as selling pressure appeared right from the beginning of the session. Accordingly, 19 component stocks of the index corrected, with the focus on BSR (-3.83%), MSN (-2.83%), FPT (-2.41%), TCX (-2.28%), VHM (-2.20%), GAS (-2.19%), and LPB (-2.10%). Additionally, 6 other stocks corrected by over 1%. On the contrary, demand remained steady for HPG (+2.17%), GVR (+1.43%), and VPL (+1.35%).

VN30 Future chart: Moving average test

Market sentiment turned negative upon the appearance of a red candle, which broke the previous accumulation phase. Therefore, the downtrend might return, especially since liquidity remains at a low level.

However, the signals lack consistency because uptrend indicators remain confirmed. Accordingly, the contract still closed above the 10-period and 20-period moving averages. Thus, the market requires a breakout session to confirm the upcoming trend.

In the next session, the 1,840 - 1,860 point zone will act as strong short-term support, which coincides with the October 2026 bottom, while the 1,900 - 1,940 point zone will act as strong resistance.

Technical strategy

The signals lack consistency. Therefore, traders need to observe cautiously and wait for a confirmation signal before they open new positions.

Table 1. Future statistics

(points, %, contracts)
